

The Hy-Performing Grass Blend

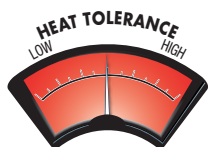

HY-PERFORMANCE BLUE brings together the benefits of two types of turfgrasses with the perfect blend of bluegrasses and hybrids.

HY-PERFORMANCE BLUE has been assembled with proven varieties that will satisfy the needs of the sports turf manager, the park and recreation manager as well as the homeowner looking for a great-looking lawn.

We are driven to deliver a turf that will provide safe and quality turf surfaces for a variety of uses. HY-PERFORMANCE BLUE has been compromised of equal portions of the following turfgrasses:

MIDNIGHT Kentucky bluegrass is more than capable and this elite variety is ready to show its colors. With strong disease resistance, it has a very fine leaf texture and grows lower and slower than most bluegrasses.

slower growth rate add to the strength of HY-PERFORMANCE.

PRINCETON 105 is a dark green variety classified as a "Compact type" of improved Kentucky bluegrass. It exhibits excellent traffic tolerance, and is a cold hardy, persistent, attractive grass that through the development of an extensive rhizome system forms a well-knit, durable sod.

BANDERA Texas and Kentucky bluegrass hybrid combines the extensive rhizomes and heat and drought tolerance of Texas bluegrass with the turf quality and density of Kentucky bluegrass. Sports fields and parks will benefit from its high performance.

BEDAZZLED Kentucky Bluegrass exhibits improved color, texture and disease resistance over many other turfgrasses. Broad adaptation to various management regimes, its prostrate growth habit and
